GLEICHEN, ALBERTA, WEDNESDAY MAY 24, 1939

SUBSCRIPTION \$2.00 PER YEAR

## MANY PEOPLE PLAN GOING TO BASSANO FRIDAY

The Royal Train arrives at Bassano at 12:45 a.m. sharp. Those going to the children are urged to be there at 11:30. The parade past the train will be led by Scouts followed by Girl Guides, Bassano school children and all other schools as they arrive. An excellent opportunity will be given all children to see Their Majesties as they pass the Royal Coach and again as the train pulls out of the station. It is now known that 85 school children will be going from Gleichen in addition to the adults. Most of the surrounding schools south and east of Gleichen are said to be going to Bassano. A large number of Gleichen people will also go to the eastern town.

For those who go to Bassano the following information may be of use to them according to the Bassano Recorder: "All officials connected with the Royal Visit will carry committee ribbons and citizens are requested to take instructions from those only officially in charge. A special detachment of the Royal Canadian Mounted Police will be on hand to maintain order. All veterans will be in uniform, and will lend a willing hand whenever needed. A guard of honor will line both sides of the main line of the C.P.R. The parade will march past the Alberta Pacific elevator and will turn at the point to cross the elevator track and then turn west. It will proceed west to where the spur track joins the main line, where it will stop and face the train, remaining at attention. It is to be strongly impressed that the children are to remain between the elevator track and what is called the construction track. Those who are not permitted to get out of place, and serve as guides. Adults will cross the track and line up on the south side of the main line. Everyone is cautioned to be in place not later than 12 noon.

## THE WEEK IN EDMONTON

(By Special Correspondent)

Edmonton-Jasper highway, construction of which is a vital factor in the building up of a greater tourist trade in Alberta, is to receive benefit of an additional \$100,000 appropriation this season.

The highway, which is already receiving \$100,000 for construction this year under the joint agreement between federal and provincial governments, is the last link in the famed circle tour which is expected to attract a greater number of outside visitors in years to come.

Canada's tourist trade is worth more than \$55,000,000 annually, and of this, Alberta gets less than one per cent at this time.

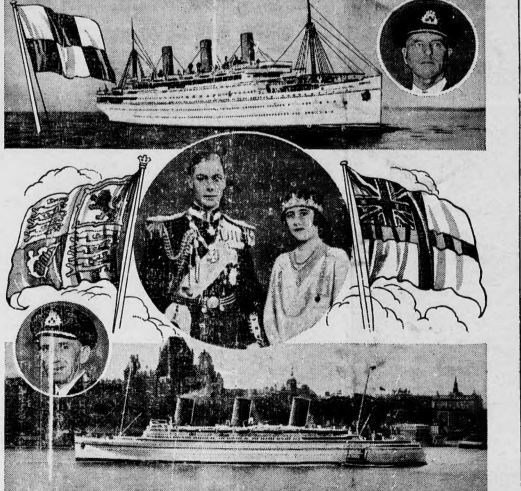

Some work will also be done on the Monkan highway. As only 15 to 20 miles of this project is in Alberta territory, the main part of the construction will be done on the B.C. side of the boundary. The work of lumber roadbuilding in that work has attraction wide attention.

In connection with the King's visit to Edmonton, officials of the Canadian Legion have asked provincial authorities to arrange for the presentation of Joseph Haire, who celebrates his 104th birthday next March 17, to Their Majesties. Mr. Haire, who is still hale and hearty, has announced that he will be out with other citizens to see the King and Queen in any case.

Department of agriculture announced during the week that 100 boys have been placed in the work under the joint youth training scheme. The positions include fur farming, market gardening, bee keeping, poultry farming and creamery work. Boys are given board and a small allowance for the first year, then placed if possible on a cash basis. Afterwards they are encouraged to start out on their own.

Visitors to the legislative buildings in future will have an opportunity of viewing a display of Alberta made

## Two Royal Liners Carry King and Queen

Two ships of the British Mercantile Marine have been honored by His Majesty the King, who with the Queen and members of their Royal retinue, are travelling to and from Canada in ocean liners of the Canadian Pacific fleet.

The 21,000-ton Empress of Australia, graceful and yacht-like as seen above at the top, brings Their Majesties to Quebec on May 15, while the giant 42,500 ton Empress of Britain will sail from Halifax on June 15 with Their Majesties on board. The Empress of Britain, in the lower picture, is seen leaving, majestically, the Chateau Frontenac at Wolf's Cove, where the Empress of Australia will land their Royal passengers.

In fact at the top is Captain A. R. Meikle, R.D., N.R.R., who commands the Empress of Australia on her Royal voyage, and at bottom Captain C. H. Spaworth, commander of the Empress of Britain, which is now ending her annual Round the World Cruise.

The Royal Standard, White Ensign and Canadian Pacific house flag, which the two liners fly on their Royal voyages, are also seen in the picture grouping.

usually suggest, however, that there is no important difference here. The tariff burden, it is true, is heavier in eastern, as well as on western, farms a higher cost for all things they buy for living and production, but the tariff imposes an additional heavy burden on the western farm industry, which is that it has definitely curtailed the exportation of much western wheat, and western wheat is the largest single agricultural or other export industry of Canada, and so I suggest merits special consideration.

But the real remedy for these tariff burdens which press so heavily on the west, and particularly on western farmers, is to lower tariffs so that the wheat, and all other Canadian primary products, may readily be sold abroad.

The United States department of agriculture calculates that the organized poisoning campaign for grasshopper control from the Mississippi River to the Pacific coast last year saved farmers' crops worth \$175,000,000. More than 400,000 farmers used approximately 155,000 tons of mixed bait to cover 30,000,000 acres and this furnished protection for more than 15,000,000 acres of crops. The Kansas City Times estimate that in the State of Kansas alone grasshoppers caused about \$7,000,000 worth of loss to crops in 1928 but that the poisoning campaign saved \$30,000,000 worth of crops from the ravages of the west.

Kansas City Times, "are now convinced of the efficacy of the poisoning campaign and the work will go on this year on an even larger scale."

No doubt the same proportionate saving by poisoning was last made in crops in Western Canada, although serious losses were experienced in southern Saskatchewan. Every farmer, therefore, operating in the grasshopper areas of Manitoba, Saskatchewan and Alberta, will save himself and his neighbors from severe losses of crops and money if he will put forth his very best efforts this spring and summer to work with his provincial and Dominion government officials, who in turn are working jointly with those in charge of the grasshopper campaign in the United States.

This claim has frequently stated that the prairie provinces have been paying a bonus to eastern tariff protected manufacturing industries of approximately 47 million dollars a year.

It was recently suggested in Ottawa that the payment of this bonus to the west could hardly be used as an argument for asking the Dominion to give special assistance to the western industry, for the fact is that eastern Canadian farmers also pay a large bonus to Canadian manufacturing industries. I cor-

## LINE ELEVATORS SEEK EXPANDED USES FOR WHEAT

Carrying on their work in seeking expansion of markets for Canadian wheat, line elevator companies have appointed Cecil Lamont as their representative to attend the American conference of representatives of agriculture, industry and science which is being held at Columbus, Ohio, under the auspices of the National Farm Chemistry Council of the United States.

"While the Columbus conference is to deal chiefly with progress in the finding of new industrial uses for soy beans and corn, its deliberations will have a direct bearing on markets for wheat," said Charles E. Hayles, president of the North-West Grain Dealers' Association. As an example of the manner in which wheat markets are being lost, Mr. Hayles cited the report of the Canadian trade commissioner to Japan in the current issue of the Commercial Intelligence Journal issued by the Department of Trade and Commerce. The trade commissioner states: "During the past several years Canada's shipments of wheat flour to Japan have been practically confined to one large firm which manufactures a seasoning extract (meat sauce and substitute) from the gluten obtained from flour. Since it is no longer able to obtain the type of flour required for that purpose (due to exchange regulations) it is using the soy beans as a substitute. This loss of business is said to mean nearly 1,000,000 bags of flour for Canada annually."

"In this instance soy beans research means a loss of markets for 2,250,000 bushels of Canadian wheat," said the editor of head. Canada has exported as much as 45,000 bushels of wheat and wheat flour in one year to Japan and China but exports to these Oriental markets are now virtually nil.

"Great developments have taken place in research into new uses for wheat and soy beans. Research has found new industrial uses for more than 80,000 bushels of corn annually, and new uses are constantly being found for soy beans. Research must be directed to new uses for wheat in order to protect this cereal from being being made in the development of substitutes for wheat and resultant loss of wheat markets."

The United States department of agriculture calculates that the organized poisoning campaign for grasshopper control from the Mississippi River to the Pacific coast last year saved farmers' crops worth \$175,000,000. More than 400,000 farmers used approximately 155,000 tons of mixed bait to cover 30,000,000 acres and this furnished protection for more than 15,000,000 acres of crops. The Kansas City Times estimate that in the State of Kansas alone grasshoppers caused about \$7,000,000 worth of loss to crops in 1928 but that the poisoning campaign saved \$30,000,000 worth of crops from the ravages of the west.

Kansas City Times, "are now convinced of the efficacy of the poisoning campaign and the work will go on this year on an even larger scale."

No doubt the same proportionate saving by poisoning was last made in crops in Western Canada, although serious losses were experienced in southern Saskatchewan. Every farmer, therefore, operating in the grasshopper areas of Manitoba, Saskatchewan and Alberta, will save himself and his neighbors from severe losses of crops and money if he will put forth his very best efforts this spring and summer to work with his provincial and Dominion government officials, who in turn are working jointly with those in charge of the grasshopper campaign in the United States.

"The line elevator companies through their organization - the North-West Grain Dealers' Association - brought forth the plan for the establishment of a division of the National Research Council in Western Canada whose principal duty would be research into industrial utilization of wheat as well as finding new edible uses for this cereal. The proposal has already found support on the floor of the Dominion parliament, and early development of the proposal is hoped for. The line elevator companies have also placed before the International Wheat Advisory Committee, now meeting in London, England, a proposal for the establishment of an international laboratory in London. This laboratory would be staffed with leading scientists drafted from various countries, whose duty it would be to conduct research into expanding uses for wheat throughout the world. Communications received from Andrew Cairns, secretary of the Wheat Advisory Committee, indicate that the special report made by Mr. Lamont after a visit to the leading research laboratories of the United States last winter and submitted to the international committee in London received the approval of the United States last winter. Mr. Cairns reported that the delegates from France, Poland and the United States were particularly interested in the Canadian proposal for continuing its deliberations in London at the present time and it is to be hoped that early action will be taken in dealing with this phase of seeking a solution for the surplus wheat problem. Expansion of markets for wheat and the placing of the surplus production into constructive channels will have a direct bearing on improvement of the price structure," he said.

## CORRESPONDENCE

Editor Call: Due to varied misconstrued ideas about regarding the Canadian word to commence next door to Rexall Drug Store, this notice is found necessary. This work is not a branch of, nor a combination of the Prophetic Bible Institute, Calgary or Prairie Bible Institute, Three Hills, nor connected with any church body, neither is it our work. It is The Lord's Work. Therefore, would kindly ask all to recognize and honor it as such. Look for service announcements at the Mission Hall. Thank you. H. STEWARDS.

## TOWN OF GLEICHEN

All dog licenses expired on April 30th 1939. Effective immediately any person or persons possessing or harboring a dog or bitch in the Town of Gleichen for which no 1939 license has been procured shall be liable to a fine.

Licenses are procurable at the Town office.

W. J. PHYTHIAN, Secretary-Treasurer.

## Town & District

Mr. and Mrs. Cecil Lyons of Calgary were Gleichen visitors Sunday.

It is said over 300 "chats and Indians" will board the special train here for Calgary on Friday.

J. Green of Irricana, formerly a C.P.R. passenger at Stettin, was in town looking after his business interests here.

Judging by the number of people who listen to the broadcast of the visit of the King and Queen to Canada, all are keenly interested.

Miss Millay, a former Gleichen school teacher but now living in Calgary, spent several days in town last week looking after her property interests here.

The 22nd Battery has received new uniforms and on Sunday paraded. The Battery is now up to strength.

Mr. and Mrs. R. M. Stashback of Calgary spent Sunday in town visiting relatives and friends.

Truck drivers who wish to carry passengers during the Royal Visit are reminded that a permit for this must be obtained. The permits are free. Owing to the great amount of traffic that will create the roads at that time, truck drivers have been warned that 35 miles an hour is the speed limit, that parking on main highways is prohibited, and that every truck must come to a full stop before crossing any railroad track. Traffic officers will patrol the highways to match for violations of traffic rules.

The problem of encouraging Royal Visit spectators to cheer along the progress route has engaged the attention of officials. Heavy British "Hurrah" succeeded by "Hip! Hip!" are the thing. It has been suggested that school teachers should have taught their charges in the interests of a successful demonstration by Albertans. Stand up and cheer is the way to do it, and once the first effort is underway the roaring Royal Cavalcade will stimulate more and louder yells. Incidentally the common pronunciation of "hurrah" is "har-rarey" and this will be found quite adapted to the Canadian tongue. Here's for louder and longer "hurrahs!"

## CONSERVATION AND RESTOCKING WILD LIFE

The fish and game branch of the department of agriculture, is undertaking to move beaver from areas where they are plentiful to parts of the province where they formerly existed in large numbers, as part of its conservation program.

For this purpose, specially constructed cage traps have been secured, in which the animals, and if necessary, the whole beaver family, where plentiful and doing damage, may be humanely caught and removed to other areas.

The fish and game branch is adding to its equipment a special unit constructed for the department of agriculture known as an "oxygen transfer tank and truck." This equipment is being purchased to facilitate the transport of fish fry from rearing ponds and hatcheries to lakes and streams. The tank will be the only one of its kind in Canada, and will be one of the most up-to-date scientific pieces of equipment in use on this continent.

Under the direction of the fish and game branch, white fish spawn have already been placed in Lake Watbunum, Chip Lake, Lake St. Anne, Lac La Biche, Pigeon Lake, Battle Lake, Murel Lake and Marie Lake. Sufficient fish eggs to fill the Watbunum and Battle hatcheries have been purchased and it is reported that hatching is well in advance of any previous years.

The conservation of wild life is one of the main responsibilities of the fish and game branch, and it is determined to stop all illegal practices and solicits the co-operation of everyone towards this end.

## YOUTH TRAINING

Under the Dominion and Provincial Youth Training Scheme, the department of agriculture directs the placing of urban boys, between the ages of 18 and 30, in various forms of agricultural work. These boys are placed where there is a reasonable opportunity of their securing a business for themselves. Among the projects in which the boys secure positions are the following: fur farming, beekeeping, market gardening, poultry farming and cranberries.

There are about 100 boys in training at the present time and additional positions are open, particularly on fur farms, beekeeping and market gardens. The scheme provides for training for a period of 12 months.
